To Calculate Averages: Total points / # of sports = average to 3 places

Example: 32 points / 7 sports = 4.571

In case of a tie, the points will be added and divided between affected teams.

Example: Two teams tie for 2nd in a seven team sport. Add 6 and 5 together equalling 11.

Divide 11 by 2, so both teams get 5.5 points.
